

SGC	EQOf fluids [®]	Quality Policy
		Rev.03 · Date: 19.04.18

D. Miguel Cerdá Cotanda, as a manager, have established the EQOf fluids organization's Quality Control. Through the Quality Control, we commit to the development and the implementation of the quality management system (QMS) to the continuous improvement and efficiency, and to satisfy the customer requirements that have to be established inside the quality manager system within the defined scope:

“Design, assembling of fittings and the merchandising of pipes and fittings for pressurized fluids”

Through this document I would like to declare the relevance and importance of the activities of all staff and the need for collaboration and the achievement fulfilment of the target, as well as the importance of satisfy both requirements the legal and regulations.

To support the development of quality management system, we commit ourselves the provision of adequate and necessary human and material resources. To perform annual review of the Quality Control System and to communicate to all the team members the outcome concerning the follow-up of the objectives.

Our Quality Policy is supported by **specific guidelines**:

- **Provide products and services able to satisfy to the needs of our customers.**
- **Satisfy agreed delivery deadlines.**
- **Ensure customer satisfaction regarding for its requirements.**
- **Provide a product with high level and performance, preserving an appropriate quality and design. Also improve and raise the Hight quality of our services and products.**

Ask for the cooperation of the correct development of the Quality Management System.

D. Miguel Cerdá Cotanda
